PROTERO™

Lawn Care Equipment Minneapolis Mn

Lawn Care Equipment Minneapolis Mn

Welcome to Protero Inc., manufacturers of professional lawn care equipment, including leaf vacuums, grass baggers, lawn mower grass catchers and Pro Rake dethatchers. We offer dump from the seat, container and cloth baggers for the zero turn, walk-behind, garden tractors and utility tractors including John Deere, Cub Cadet, Snapper, Toro, Kubota and more.

Commercial Blower

As a leader and innovator in commercial leaf vacuum equipment, we at Protero are dedicated to providing our customers with the best products possible. Whether you are searching for a commercial grass catcher or commercial blower you can take comfort in knowing that we've put our all into ensuring that each and every one of our customers are happy with our work.

Pro Vac 232

Pro Vac 232 is the perfect vacuum collection system for commercial zero turns for one-step bag collection. It comes with two 30-gallon containers for capacity of 7 bushels.

The narrow profile and angled top allows good visibility and clearance. The vertical Blower adds only 11" inches to the mower width. Adding plastic liners to the two 30-gallon cans makes bagging leaves a one-step operation.

The PV 232 catcher is compact and light for one person to quickly attach and detach. The frame is simple and easy to disassemble for storage.

Pro Vac 230

Pro Vac 230 is the perfect vacuum collection system for commercial walk behinds and surfers. It comes with two 30-gallon containers for capacity of 7 bushels.

The narrow profile and angled top allows good visibility and clearance. The vertical Blower adds only 13 inches to the mower width. Adding plastic liners to the two 30-gallon cans makes bagging leaves a one-step operation.

The PV 230 catcher is compact and light for one person to quickly attach and detach. The frame is simple and easy to disassemble for storage.

The PV230 comes as a complete unit, full assembled. The only requirement is mounting the leaf bagger and blower to your mower. Some holes drilled are needed to mount the blower to the deck.

Grass Catchers

The PV18 Lawn Vacuum Catcher holds 14 1/2 bushels. The collection system offers efficient material reduction and high capacity. The wedge shape of the PV 18 only adds 20 inches of length to most mowers. The dump lever is easy to pull and gives a secure and positive spring-like feel when the door is latched and locked into place. The improved tubular frame offers increased strength for demanding conditions.
